

SAINT-GOBAIN
GLASS

*It's easy and
instantaneous!*

RANGE OF PRODUCT

Min. dimensions :
305mm x 405mm.

Max. dimensions :
1000mm x 2800mm.

Standard thicknesses :
11 mm, 12mm, 14mm.

Thicker assemblies are available on request.

Available colours :
neutral, bronze, grey, green.

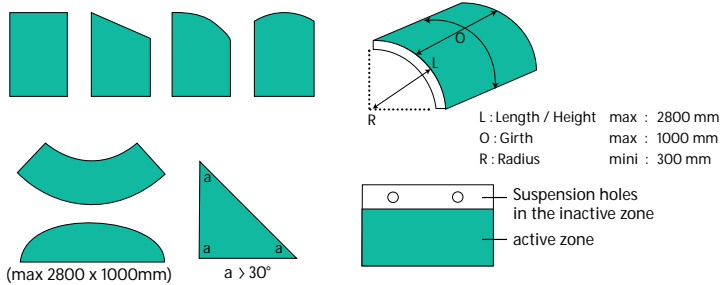

INSTALLATION

SGG PRIVA-LITE is intended essentially for internal applications. It may also be used in external glazing - subject to approval by our Technical Department. SGG PRIVA-LITE is to be used at temperatures within the range of -20°C to +60°C.

SGG PRIVA-LITE is electrically connected

to a special power transformer, provided for a primary voltage of 230 V 50 Hz. Power consumption is less than 5 Watt/m². Specifications for connection are provided with the product.

PROCESSING : AVAILABLE SHAPES

PERFORMANCES

Physical properties (nominal values)	Single glazed SGG PRIVA-LITE 55.2 (11 mm)		Double glazed SGG PRIVA-LITE 55.2 (28 mm)

SGG PRIVA-LITE®

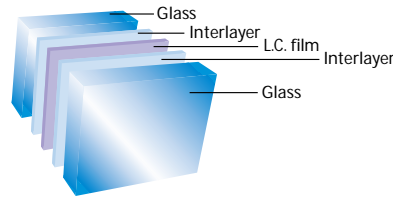

Privacy at will...

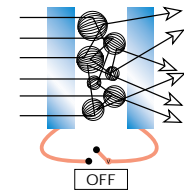

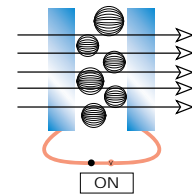

SGG PRIVA-LITE[®], transparency or intimacy,...it's your choice!

For those times when you want to be shielded from prying eyes, SGG PRIVA-LITE, "intelligent" glass, offers you instant privacy at the flick of a switch.

SGG PRIVA-LITE's unique technology allows it to be switched from an ordinary-looking clear glass to a whitish translucent glass, ensuring optimal vision control. SGG PRIVA-LITE is a laminated glass comprising two panes of glass, either clear or tinted, and a liquid crystal interlayer film.

When the glass is switched off from its special power supply (transformers provided), the liquid crystals are randomly scattered, preventing both sides from seeing through the glass. By switching the glass on, the liquid crystals line up and reorient themselves, turning the SGG PRIVA-LITE totally transparent.

APPLICATIONS AND FEATURES.

Partitioning :

- Transmits the same quantity of light (approximately 77%) in both transparent and translucent states.
- Curtains and blinds become redundant.
- Hygienic.
- Besides its excellent acoustic insulation properties, SGG PRIVA-LITE can also be combined with our range of sound-proof glazing.
- SGG PRIVA-LITE is tested in accordance with the CENELEC European Standard and can meet your security requirements.

External vertical glazing :

- SGG PRIVA-LITE is UV-proof, remains stable with time and requires no specific maintenance.
- Can be incorporated into single or

double glazing.

- Can be curved, silk-screen printed or sand-blasted.

Safety & Security :

- High level of safety due to the laminated glass
- Combined with our range of bullet resistant glazing, it becomes a very efficient anti-bandit glass.
- Ideal for hiding precious items to be revealed only to selective audience.
- Can be incorporated into fire-resistant glazing.
- Its electric consumption is low. SGG PRIVA-LITE comes with a 5 year guarantee.

Screens :

- Excellent video or slide projection screen due to a high resolution
- Outstanding luminosity and colours thanks to the light-diffusing effect of the liquid crystals.
- Amazing special effects are possible by alternating between transparent and translucent states.

Transport :

As partitions or windows, SGG PRIVA-LITE also offers novel solutions to the automotive sector.

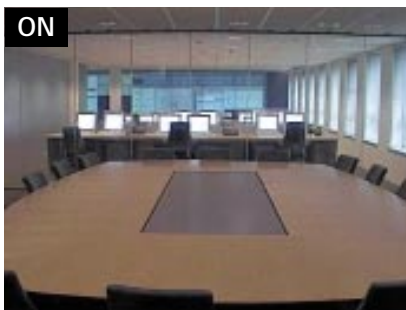

- innovation.
- design.
- eye-catching.

◀ **BT Auditorium and Media Centre**
Newgate street
 • Architect : *Ian Logan, Aukett Europ, London*
 • Installer : *Saint-Gobain Glass Solutions*

Main benefits :

- sGG *PRIVA-LITE* ensures privacy and confidentiality at will
- High acoustic performance of the partition due to the used of acoustic sliding doors and sGG *STADIP SILENCE* film
- The stylish features of the curved sGG *PRIVA-LITE* contribute to the corporate image of the company

◀ **Versatel, Bossinade Lightworks BV**
Amsterdam

Main benefits :

- sGG *PRIVA-LITE* ensures privacy and confidentiality at will.
- sGG *PRIVA-LITE* is working like a wave : all the pannel are swiched independently right to left.

sGG *PRIVA-LITE* can be used in :
meeting rooms, office partitioning, lobbies, reception areas, control rooms, restaurants, at home, ...

OTHER APPLICATIONS

▲ Bombay Sapphire fish tanks

*Heathrow Airport Terminal 4,
Departures level January and
February 2001*

Main benefits :

- *SGG PRIVA-LITE can be very surprising.*
- *Eye catching tool to promote the Bombay Sapphire brand.*

▲ Media Gallery

Bertelsmann expo 2000 hannover

Main benefits :

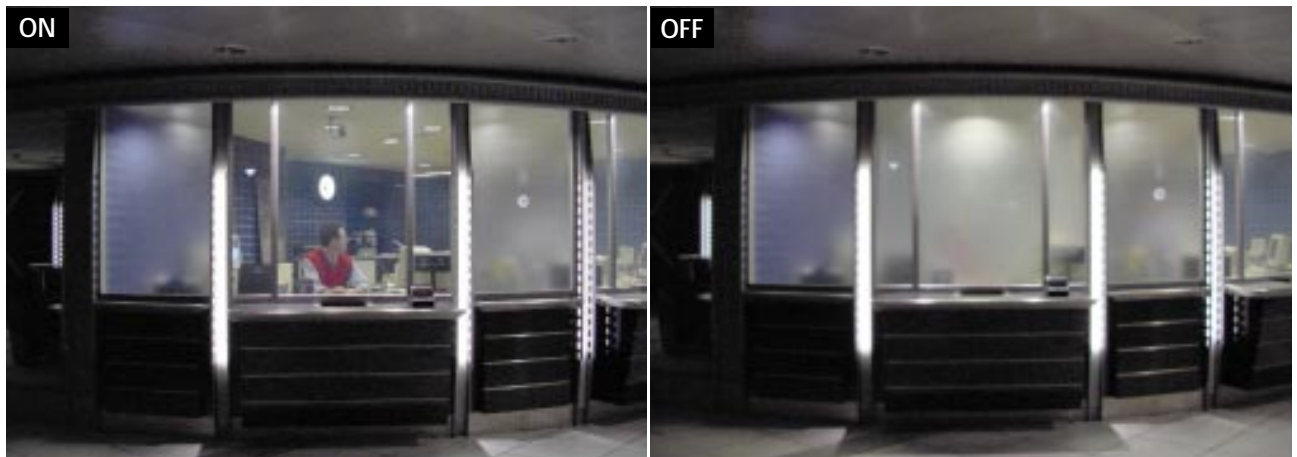

- *SGG PRIVA-LITE allows amazing multi media animations*
- *Possibility to have goods selectively.*
- *Protection against theft.*

▲ 55 Av. Georges V
Paris, France - lift

Main benefits :

- High level of safety due to the laminated glass.
- Original design.
- Provides modesty screen.
- Security glazing tested according to the CN 356 P4A standard in 55.2 composition.

▲ SNCB (Belgium railway),
Brussels center-Luxembourg train station - Belgium

Main benefits :

- sgg PRIVA-LITE can be incorporated into bullet-resistant glazing.
- It visually shields employees instantaneously from menace.
- In translucent state it indicates that a counter is closed.
- Curtains and blinds become redundant.
- Advertising with back projection become an additional option.

sgg PRIVA-LITE can be used in :
bank counters, exchange offices, post offices, jewellery stores, libraries, theatres, museums, ...

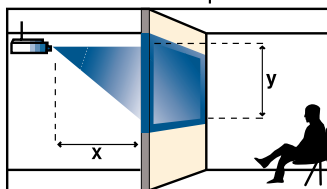

◀ Milkmuseum

Gruppe Besnier, Laval, France

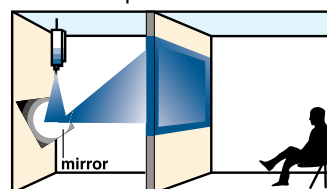

Main benefits :

- High resolution
- Enhanced contrast (available with tinted glass)
- Large view angle
- Up to 2 times brighter images than front projection
- High acoustic performance: avoid noise from the projector side
- Eyecatcher screen: transparency at will(on)
- Projection equipment is hidden behind the screen
- Compatible with LCD, VLD, slide and light valve projectors
- Available in wide screen format
- Safety and security: laminated glass, can be combined with anti-fire glazing
- Only 11mm thickness
